SIT725 PRAC 6

Dr. Alessio Bonti

TESTING

Intro

Testing testing testing, how do we ensure quality in the face of changes? By writing tests !

Instructions

Testing is vital to software maintenance. Please pay attention, as testing is required to prove HD worthiness in your group project.

Part 1
Use the slides provided and attend the prac to learn about basic strategies for testing.

Part 2
As per the last weeks, import your weekly project into a new repo. Make all the due modifications to apply tests into it.

Delivery

Once you are done, push your code into your repo, giving the repository the following name sit725-2021-t2-prac6 , ultimately this should read as https://github.com/username/sit725-2021-t2-prac6 .

If you want to be sure, simply clone your repo. If you can clone it, I can clone it 😊
